# Our know-how

Made  by SPSfiles

In our workshop we provide you with our know-how, associated with great rigour, allowing us to master every stage of the manufacturing process.

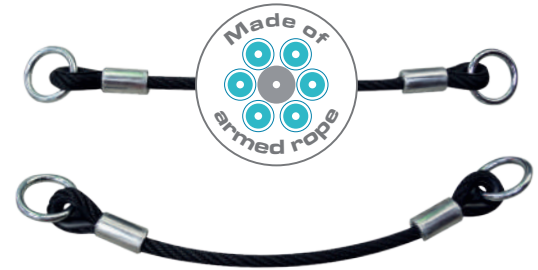

This year, we are proud to welcome Kujanak to the SPS Files family!

Proud member of

# Crimping workshop

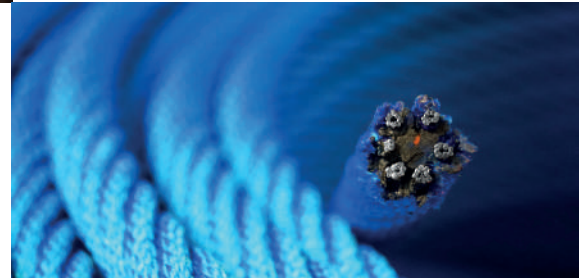

Made  by SPSfilets

The crimping technology gives an unequalled finish and a better life-time.

It also offers high-end elements with more color choices within your aerial rope courses.

**Please feel free to contact us !**

# Type of wood

We supply a “**ready for use**” range of woods which comes from French forests and gives you the choice of wood’s variety for your constructions.

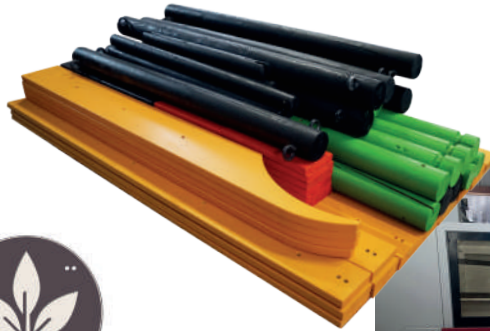

- 1 - Sustainable chestnut wood** (+20 years). EN 350-2 Class 4 Standard according to NF EN 335-2. Chestnut wood is an environmental-friendly alternative against chemically treated wood. It does not need particular treatment/facility at the end of its life.
- 2 - Sustainable larch wood** (+20 years). EN 350-2 Class 3 Standard according to NF EN 335-2. Larch wood is a natural wood which does not need preservation treatment.
- 3 - Autoclave Class 4 wood chemically treated** EN 351-1 Class 4 Standard.

# Make up your tailor-made obstacles easily

Thanks to our range of possibilities, bring some personality, colors and fun to your courses.

**Wood engraving technic**  
on CTBX exterior plywood  
via digital control.

**Wood painting.**

**Wood cutting**  
plywood on  
digital machine.

**Digital print**  
on CTBX exterior plywood.

**Please feel free to contact us !**

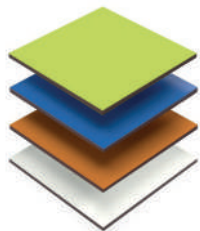

# Discover also our alternative materials

New materials for new play modules, let's create together your future circuits with these innovative materials..

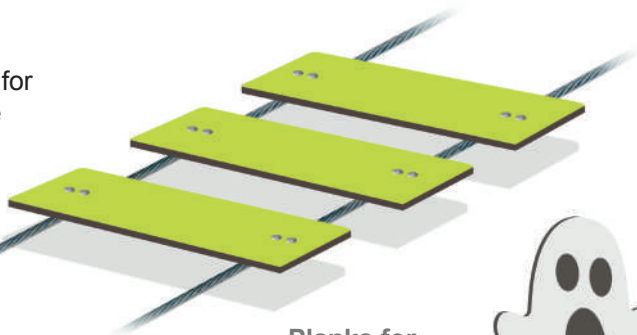

## HPL

Compact laminate for even more durable modules!

8 mm or 12 mm.

**Wide choice of colours**

Planks for  
bridge, foot  
plank islands...

Planks  
for bridge

## PEHD

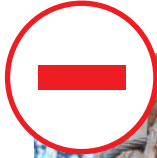

recycled plastic UV  
and weather resistant.

Logs

Ø 100 mm  
or Ø 120 mm.

**Please contact us**  
for delivery times!

## The Kujanak anchoring

The concept of using bolts and anchors enables an installation at a safe distance from the trunk. Thanks to this **eco-friendly method** the tree can continue to grow freely.

A bulge appears around each insert and forms a scar. This contributes to seal the wound and **reinforces the tight fit of the bolt.**

## Conventional anchoring

Conventional fastening systems exert **considerable pressure on the bark**, resulting in the **death of the tree's upper layers.**

The consequences are disastrous: development of fungi, insects, bacteria...

# The Kujanak platform

The Kujanak platform is environmentally friendly and 100 % recyclable. Ready-to-assemble delivery.

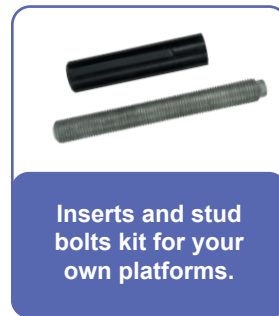

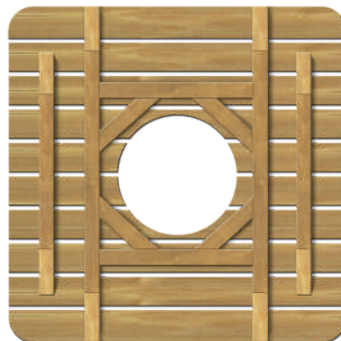

## Douglas fir Structure

Out of sapwood: section 60 x 220, pre-drilled for bolts.

Ref **KPF-OCTO**

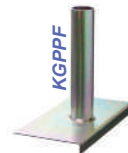

**Quick installation in four steps:** assembly, positioning, drilling and assembly.

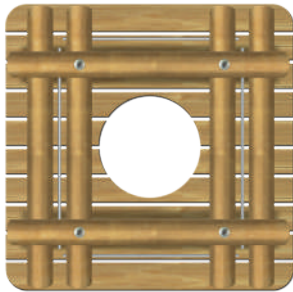

Les +

## Tool case

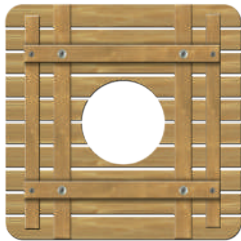

# 6 logs / rafters Platform

The eco-responsible anchoring system can also be installed on self-built rafter or log platforms. In this case, use 330/400 mm inserts and stud bolts.

# Zipline landing platform

The purpose of the zipline landing platform is to **make it easier, safer and more comfortable** for riders to land when arriving on the platform at the end of the zip line. Fits octagonal platforms.

Ref *KRECEPTY*

With an articulated joint to reduce strain on the platform and pressure on the trunk.

Hook

Ref *KCHAP-JA-V22*

# Platform prop

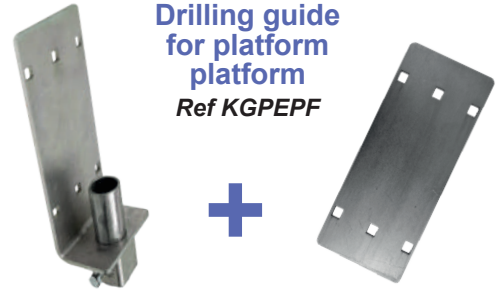

The purpose of the prop is to reinforce the platform  
To improve its stability, in particular **for large platforms**  
or those that have to withstand unusual loads.  
**Ref KETAI-PF**

4 props ensure stability of the platform. They support the corners of the platform and on the trunk with the insert/ bolt system.

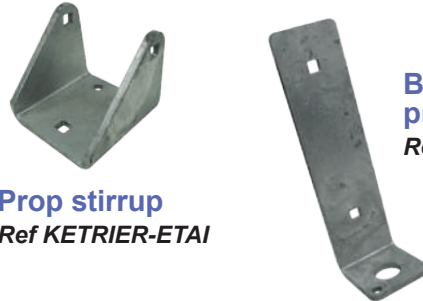

- **Steel screed**

# Platform on bracket

## Standard

Treated timber class 4.  
Board thickness 32 mm  
(1,25 in)

Preserved trees

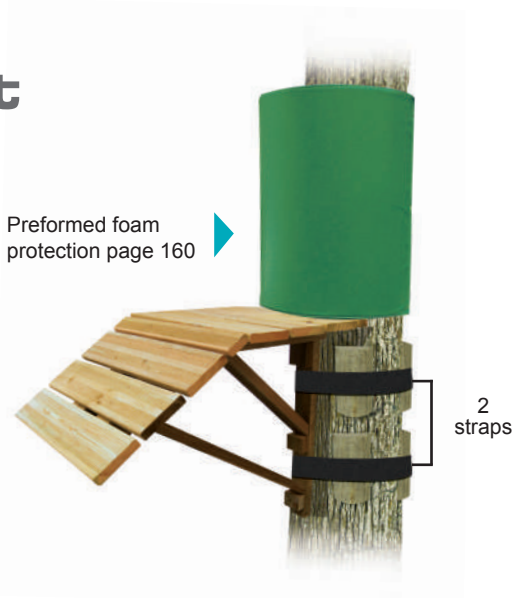

## Option

Platform for zip-line easily adaptable to the standard model.

Preformed foam protection page 160

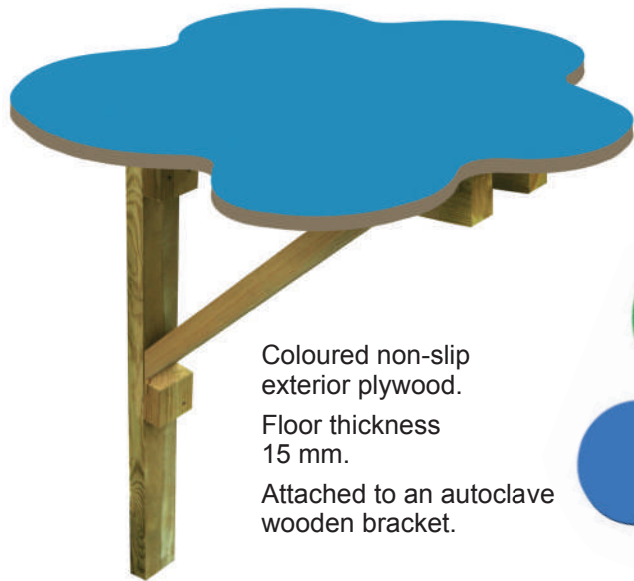

## We can deliver also

- Straps width 35/50 mm.
- 1/2 logs.
- Screws.

## Pimp my platform

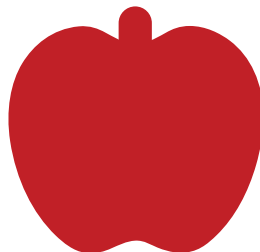

Coloured non-slip exterior plywood.

Floor thickness 15 mm.

Attached to an autoclave wooden bracket.

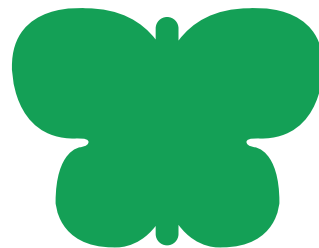

### Floor colours:

black, yellow, grey, green or brown.

### Floor shape:

apple, pear, cloud or circular plank  
Ø 800 mm.

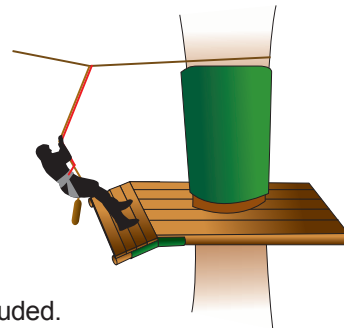

## Kit platform

## Inclined half-pipe

Coated dark green steel cuff  
Ø 120 mm, to build an inclined plane for safety.

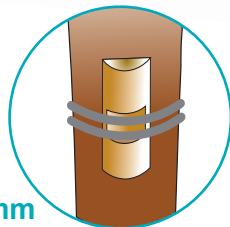

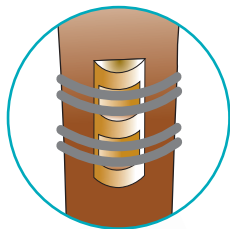

**Standard dimensions:** 1 m ■ 1,50 m ■ 1,80 m ■ 2 m.

### Treated Timber class 4. Composed of:

- Pre-drilled logs Ø 120 mm.
- Half landing deck with grooved boards (rectangular or circular).
- Assembly accessories (threaded rods, nuts, washers, screws...) are included.

# Wooden accessories

## Wooden wedge Ø100 mm

Treated Timber class 4.  
With one or two notches to protect trees.

Also exists in Ø 125 mm for Sea of nets, Courses without harness, Funbox and installation of long zip lines.

## Wooden wire rope spreader

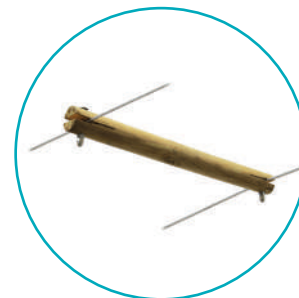

Treated Timber class

### Available in two lengths:

- 750 mm : spacing 658 mm.
- 1100 mm : spacing 1008 mm.

Supplied with  
screws and  
bolts

# Polypropylene wedges

Plastic wedges (recycled or not) are ideal for building your courses on metal structures. They are weather-resistant and 100% recyclable.

NEW

- Efficient design.
- Easy to assemble.
- High quality and durability.
- Low flammability.

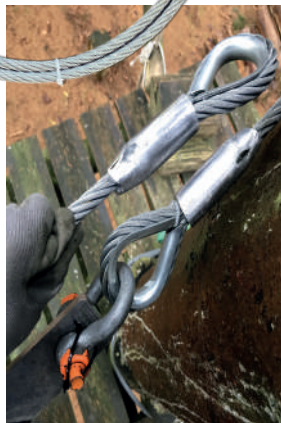

## Sleeved sling

Galvanized wire cable Ø 12 mm 7 x 19 mm equipped with 1 thimble and large opening at one end + plastic sheath at the other.

### Length

2,50 ■ 3,50  
4,50 m.

Allows to hold the fixing plates of the lifeline.

## Adjustable spacer bar

### Adjustable spacer bar

For bridges.  
Adjustable from 1,25 m to 2 m.  
Painted steel, grey colour.

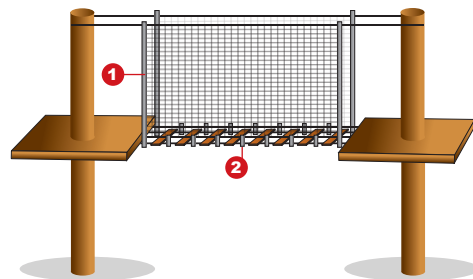

1

2

### Junction plate

For cable at the bottom.  
Painted steel, grey colour.

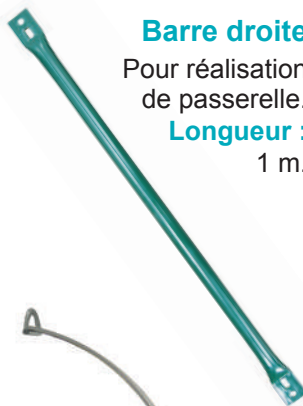

# Metal accessories

## U spreader

For net and rope bridges.

**Length:**  
0,50 et 1 m.

## Barre droite

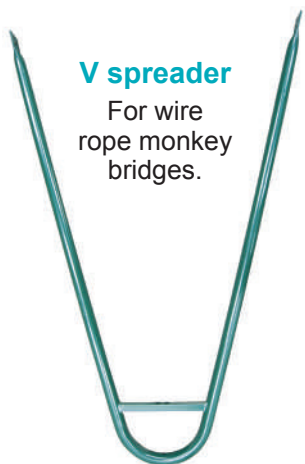

Pour réalisation de passerelle.

**Longueur :**  
1 m.

## Spreader

For monkey bridges.

## V spreader

For wire rope monkey bridges.

## Open steel circle

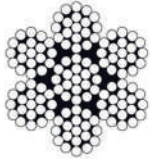

Ø 800 mm ■ Grey colour.  
For the open barrel.

## Steel circle

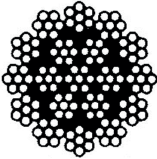

Ø 800 mm ■ Color: grey.  
For the construction of barrels.

Ø 10 to 20 mm.

## Quick links

Simple to large opening  
Ø 8 to 14. CE.

**DELTA link**  
Ø 8 to 14 mm. CE.

The game modules are supplied with accessories and packed in small packets.

# Lifting and handling material

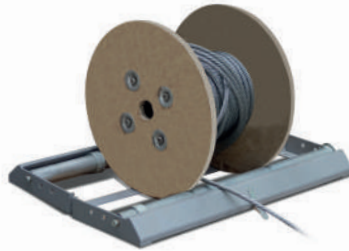

## Pliable unwinder

Pliable unwinder for cable drum.

100 lm or 500 lm.

**Doesn't take up a lot of space: pliable. moins de place.**

- Length: 530 mm.
- Width: 561 mm.
- Weight: 12 kg.

## Tubular sling

Length: 1 m

1,5 m - 2 m - 2,5 m.

Resistance: 2 T.

Color green.

Possibility of colour brown and black on request.

## Wire-strainer

Light, easy to handle and small size. Capacity 600 kg for 7 mm to 15 mm cable.

## Wire rope-gripper

Full wire rope-gripper with shackle. Capacity 380 kg for 7 to 15 mm cable or wire rope.

## Block and tackle

It has been designed for hoisting, traction and stowage works in any technical elds. 250 kg - 500 kg 1500 kg.

## CONI - KLAM

Wire rope gripper in conical shape Load: 2T from 10,50 mm to 14 mm cable.

## Portable system

to shrink caps and heat-shrinkable sheaths.

2  
Butane/Propane mix gas cartridges

1  
Gas Torch

With 2 gas cartridges you can retract 200 heat-shrink caps.

### Heat-shrink end caps

Perfect to protect cable ends.  
For cable Ø 5 to 12 mm. Color black.  
Length: 7 cm. 4,50 cm (bag of 100 pieces).

## Rope reel

### The rope

In reels. Color: green, beige, havana, white, black.

### Electric iron hot cut

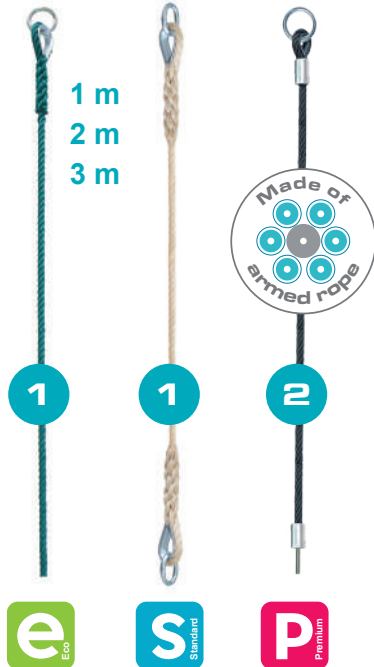

Available for sale

# Suspension ropes

We provide the suspension ropes you need to build your obstacles.

- Thimble eye and suspension ring at one end and hot-cutting at the other end.
- Thimble eye and suspension ring at each end.
- Thimble eye and suspension ring crimped on armed rope at one end and threaded rod with washer and nut at the other end.

## Our suspensions

1 m  
2 m  
3 m

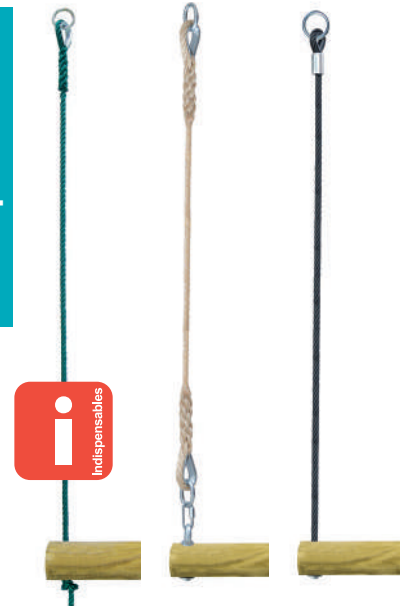

1 - Colors black, green, beige, havanna, yellow or blue (in Polypropylene)

2 - Colors black, green, beige, yellow or blue.

Can be sold per bundle upon request

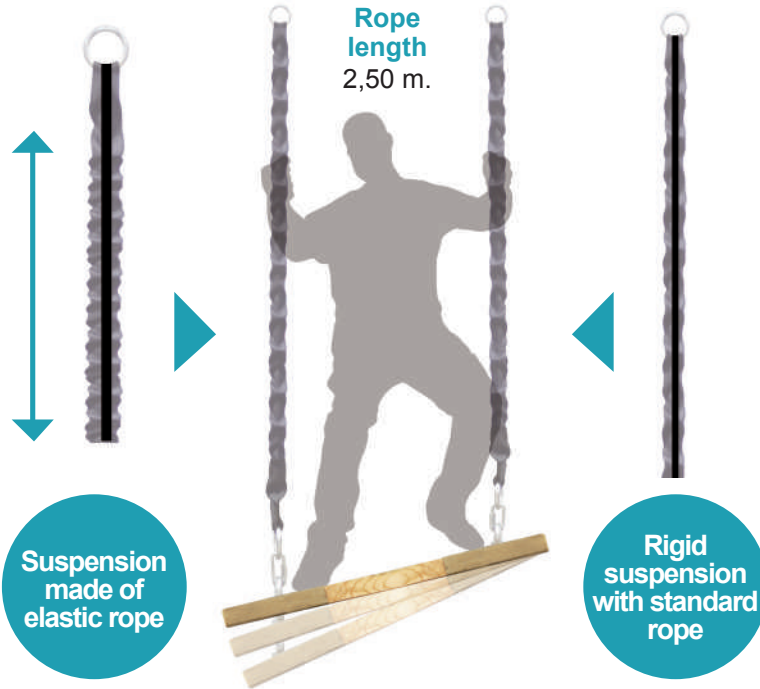

## Our products

# Moving and steady suspension ropes

Suspension rope made of elastic rope, in a tubular sling.

Suspension rope made of polypropylene rope, in a tubular sling.

Choice of suspension ropes allows you to get:

- A double steady suspension rope.
- A moving rope on left side and a steady rope on the right side and vice versa.

The climber will discover the fun at the very last moment!

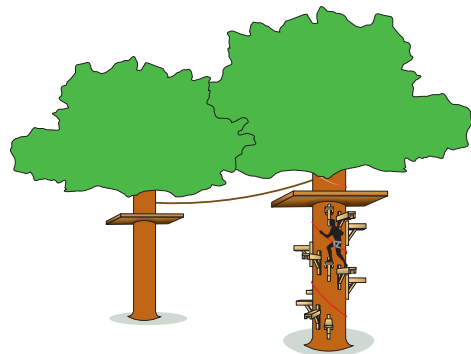

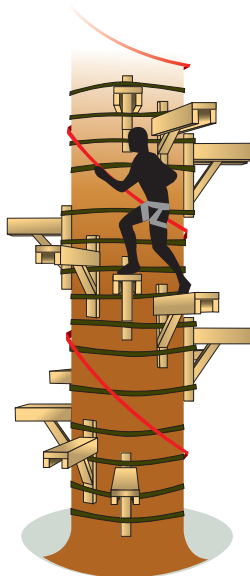

# Stairs

## Easy and quick assembly

Build your own stairs to get to the platforms.  
Treated timber class 4. Length 60 cm. Plank  
Thickness: 27 mm.

Trees are preserved

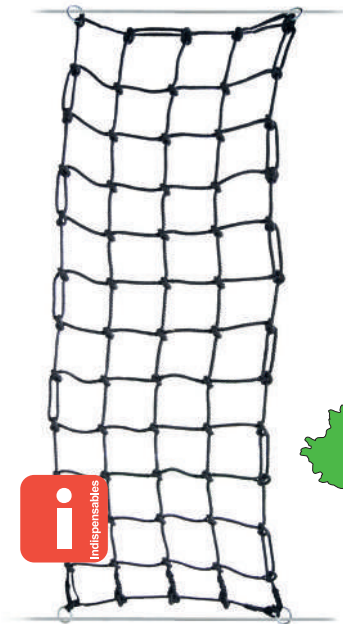

Ratchet strap  
to attach  
the stairs.

Level of difficulty

## Flying Net

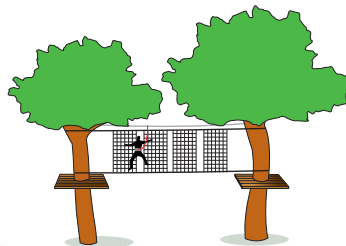

Polypropylene Net, Ø 16 mm, 250 mm square mesh with a ring on each corner.

Standard  
dimension  
in stock

3 m\* x 1 m.

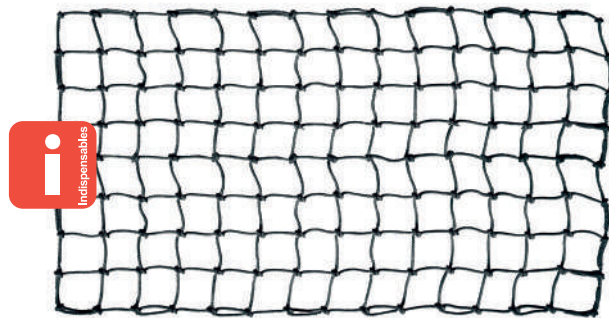

Color  
black.

Level of difficulty

## Climbing net knotted

Polypropylene knotted net Ø 16 mm meshes 250 mm square, with ring at each end.

Climbing net - Color black only

Ø 16 mm, 250 mm mesh.

Several dimensions available in stock

2 x 2\* - 2 x 3\* - 2 x 5\* - 3 x 3\*

6 x 3\* - 4 x 4\* - 5 x 5\*.

\* height of the net

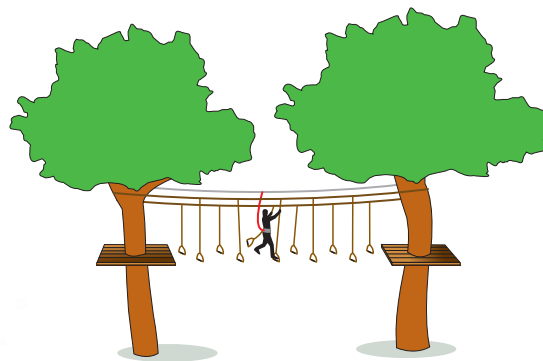

Level of difficulty

# Rope stirrup

Ø 20 mm rope with thimbled loop and ring at top. Rope loop with heat-shrink end caps for the foot at the bottom. Designed with a knot at mid-height for easy handling.

Rope length:  
2,50 m.

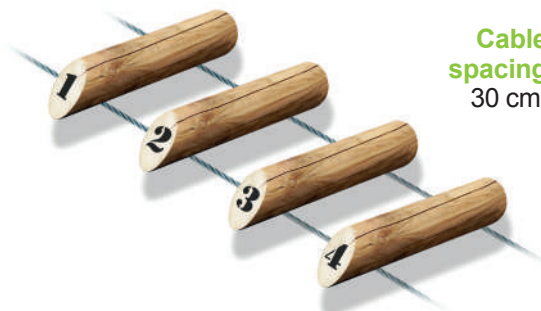

Colors  
beige, blue  
black and  
green.

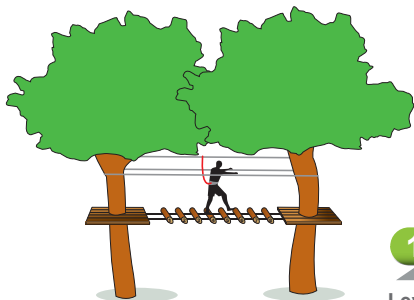

Level of difficulty

## Finnish skittle

10 cm Ø log, wood autoclave class 4, beveled at one end. Stenciled on the beveled part. Length 40 cm. Delivered with accessories. Sold in packs of 12 skittles.

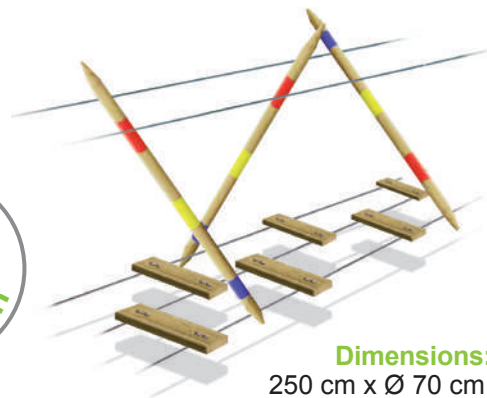

Cable spacing  
30 cm.

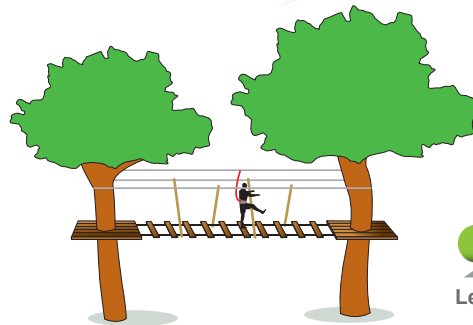

Level of difficulty

## Mikado

Class 4 autoclave wooden post, with blue and red paint on the ends, to be installed vertically as an obstacle on a footbridge.

Dimensions:  
250 cm x Ø 70 cm.

Level of difficulty

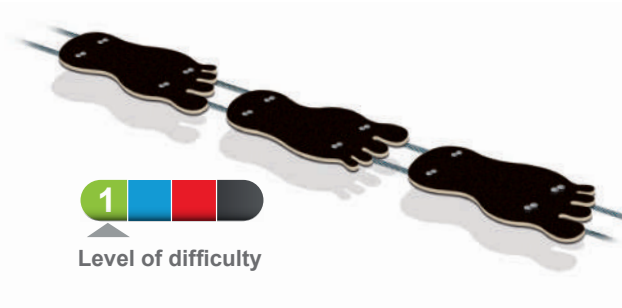

## Mini-foot

Non-slip CTBX exterior plywood engraved and stained –thickness 15 mm. To be installed on 2 parallel cables and supplied with assembly accessories.

**Dimensions:** 55 x 25 cm.

**Wire cable spacing:** 13 cm.

Level of difficulty

## Domino's footbridge

Planks in form of Domino's, in CTBX birch plywood, non-slip, engraved and stained. Installed on 2 wire cables. Supplied with assembly accessories. Set of six dominos.

**Dimensions:** 70 cm x 39 cm.

**Wire cable spacing:** 30 cm.

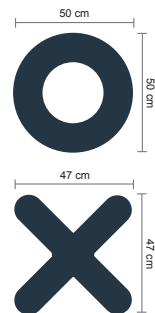

Level of difficulty

## Tic Tac Toe

X or O in anti-slip CTBX birch plywood, engraved and stained. Thickness 15 mm. Installed on 2 wire cables. Supplied with assembly accessories.

**Wire cable spacing:** 30 cm.

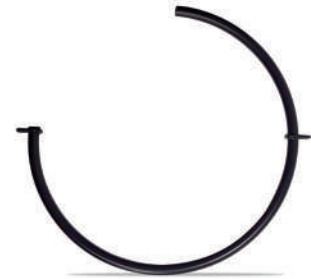

Level of difficulty

# The Moon

Three quarter steel tube to install vertically in staggered rows. Installed on 2 wire cables.

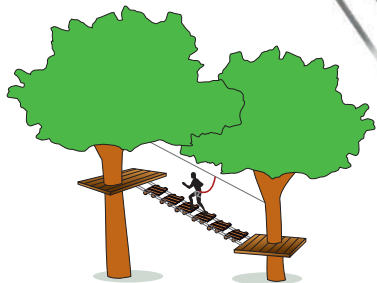

Level of difficulty

## Wooden staircase

Wood platforme made of autoclave class 4 wood, composed of 2 Ø 100 mm logs and 3 graved planks. Dimensions: 0,50 m x 0,70 m.

Wire cable spacing:  
50 cm.

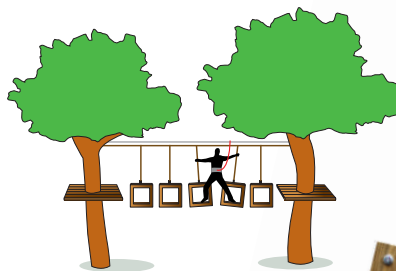

Level of difficulty

## Flying square

Made of wooden square rafter 90 x 90 mm, autoclave class 4. Dimensions: 0,60 x 0,60 m. With quick link M6 Large Opening.

Suspension sold separately and to be mounted by yourself.

Level of difficulty

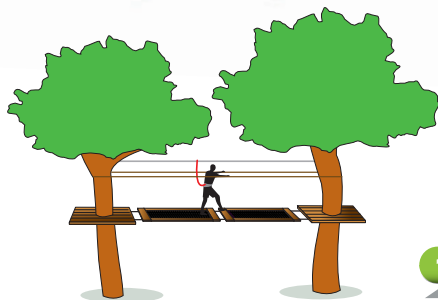

# Threaded frame

Made of autoclave class 4 board, equipped with knotless 45 mm black polypropylen net. Dimensions: 0,60 m x 1,50 m.

Accessories included.

Level of difficulty

# Walking square

Made of 90 x 90 mm wooden square rafter. To be blocked with cable clamps (not supplied). Length : 0,60 m.

Delivered with accessories.

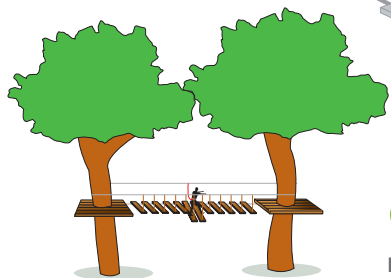

Level of difficulty

## Elastic plank

Made of grooved board, thickness 36 mm, autoclave class 4. With self-assembly accessories. Width: 165 mm. Length: 1m.

Moving  
planks

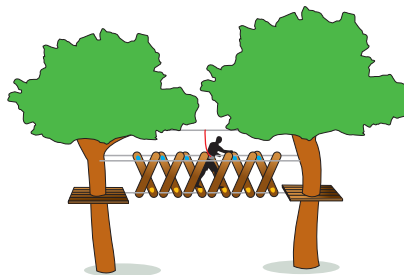

Level of difficulty

## Surf climbing

Made of grooved board, autoclave class 4. Dimensions: 1,50 m x 165 mm. Thickness: 36 mm.

Delivered with accessories.

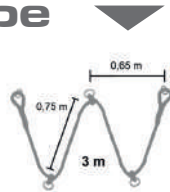

Level of difficulty

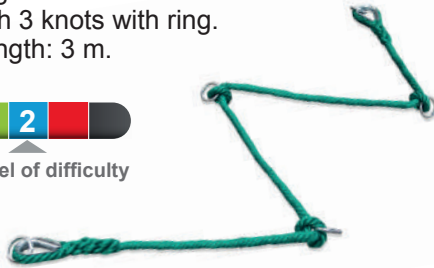

## Zigzag rope

Made of  $\varnothing$  20 mm rope made of dark green polyethylene, equipped with thimble eye and suspension ring at each end and locked with 3 knots with ring. Length: 3 m.

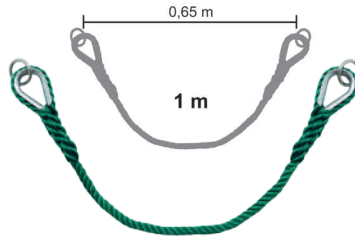

Level of difficulty

## Crossing rope

Made of dark green rope  $\varnothing$  20 mm in polyethylene, equipped with thimble eye and suspension ring at each end, to be attached on a cable. Length: 1 m.

Level of difficulty

Color green.

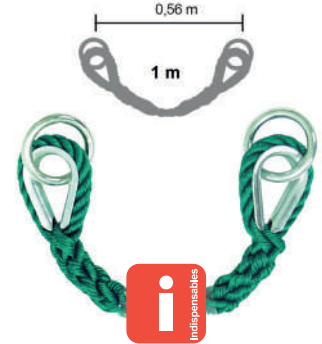

## Walking rope

Made of dark green rope  $\varnothing$  20 mm in polyethylene, equipped with thimble eye and suspension ring at each end, to be attached on a cable. Length: 1 m.

Spacing: 0,56 m.

Level of difficulty

## Hand rope

Made of  $\varnothing$  20 mm dark green polyethylene rope, fitted with thimble eye and suspension ring at the top, a knot and a heatshrinkable cap at the bottom.

Length: 0,80 m.

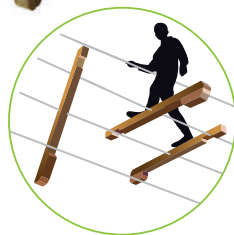

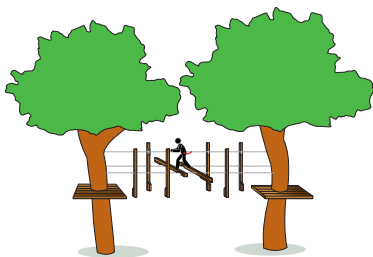

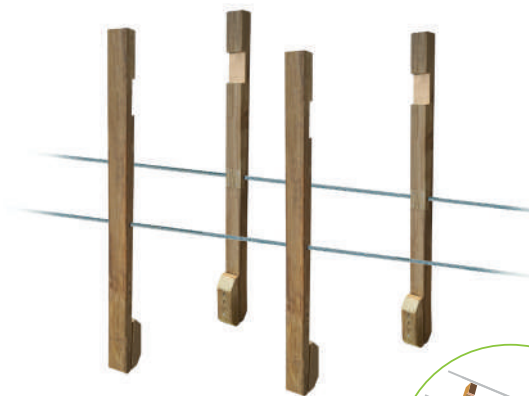

Level of difficulty

# Hammer

Made of wooden square rafter 90 x 90mm, class 4 autoclave. Installed on 2 wire cables. Height 1,80 m. Equipped with a counterweight.

Level of difficulty

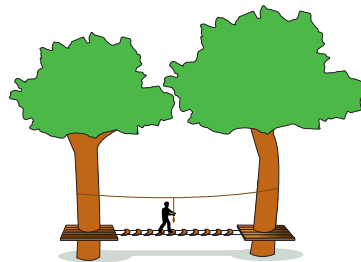

# Banana planks for bridge

Non-slip wood, banana form - Length 500 mm. Thickness: 15 mm.

Playful and fun for kids

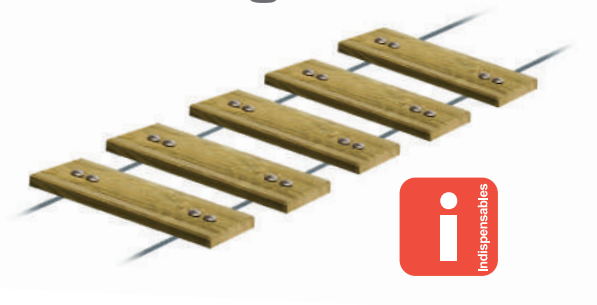

With assembly accessories.

Level of difficulty

## Planks for bridge

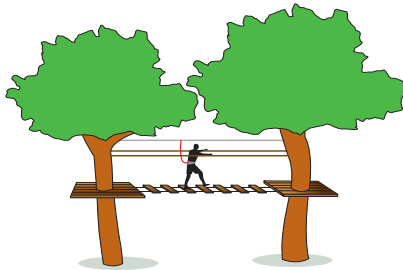

**Grooved wooden planks for bridge**

**Width:**  
145 mm.

**Thickness:**  
27 mm.

**Length:**  
500 mm.

Including assembly accessories  
(wire ropes spacing: 400 mm).

## Tightrope walker planks

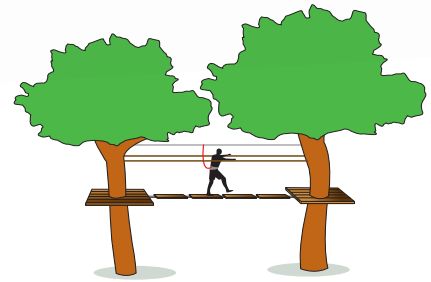

**Grooved wooden planks for bridge**

**Width:**  
145 mm.

**Thickness:**  
27 mm.

**Length:**  
1 m or 2 m.

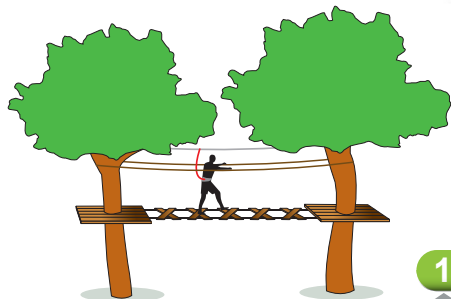

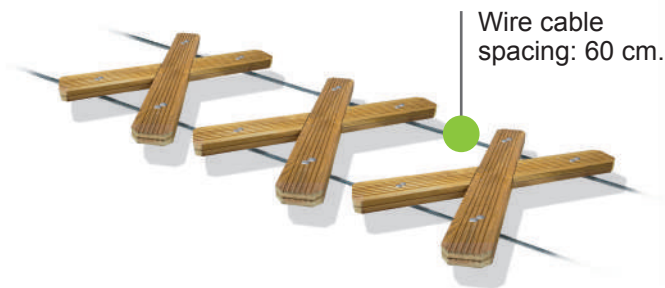

Including assembly accessories  
(wire ropes spacing: 100 mm).

## X to walk

Made of 2 autoclave class 4 pine, assembled together in a cross shape. Supplied with assembly accessories.

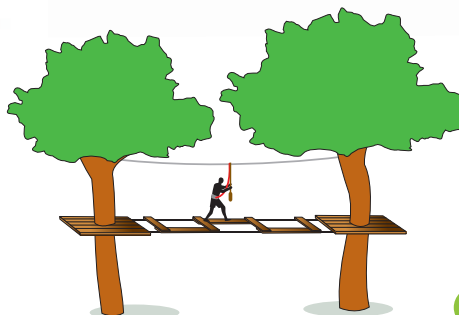

**Dimensions:** 96 x 62 cm.

Level of difficulty

## Snake

Including 2 grooved wooden plank treated class 4, one measuring 1,145 m and the other measuring 2 m.

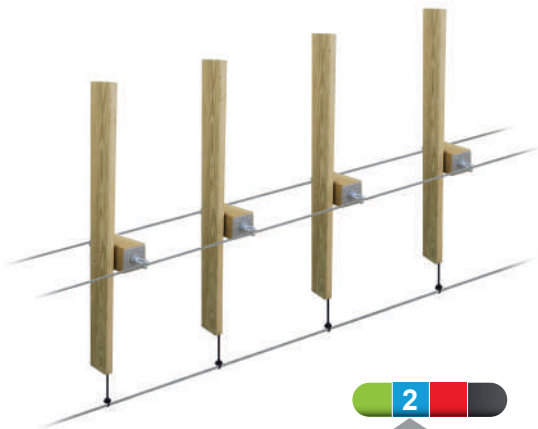

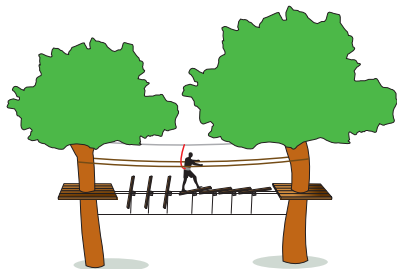

Level of difficulty

## Dominoes

Wood planks treated autoclave class 4, assembled on bearing. Automatic motion.

Length:  
1 m.

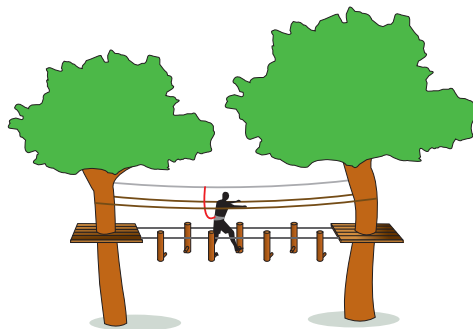

Width:  
9 cm.

Level of difficulty

## Stilt

Beech wood log Ø 100 mm, treated autoclave class 4. Length 0,66 m. Small walking log Ø 35 mm.

Assembly accessories are included.

Level of difficulty

## Dancing bridge

Set of 3 posts 90 x 90 mm, held together by a Ø 16 mm threaded rod covered by a black Ø 28 mm aluminium tubing. Module is equipped at each end with 6 green polypropylene suspension ropes Ø 16 mm, length 3 m.

### Dimensions:

70 cm  
x 8,5 cm  
x 8,5 cm.

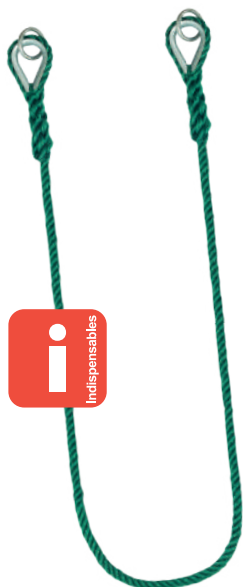

## Flying door

Made of 90 x 90 mm wooden autoclave class 4 square rafter. Width: 0,80 m. Height: 1,50 m.

Suspension sold separately and to be mounted by yourself.

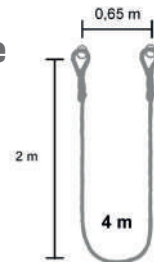

## U-form rope

Made of dark green rope Ø 20 mm made of polyethylene, equipped with thimble eye and suspension ring on each side of the end.

Standard lengths:  
2 m and 4 m.

Color green.

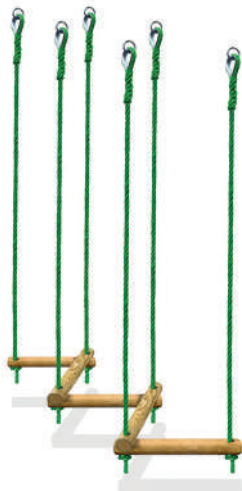

## Accordion log

Made of Ø 60 mm log, autoclave class 4, with 2 holes for the passage of ropes.  
Length: 0,50 m.

Level of difficulty

## Accordion board

Made of grooved board, autoclave class 4, width 145 mm.  
Equipped with 2 holes for the passage of ropes. Length: 1,10 m.

Level of difficulty

## Hanging frame

Made of grooved board, autoclave class 4, with 4 holes for the passage of the ropes. Dimensions: 0,50 x 0,50 m.

Level of difficulty

## Hanging bridge

Made of grooved board, autoclave class 4, with 4 holes for the passage of the ropes. Dimensions: 0,50 x 0,50 m.

Level of difficulty

Suspension sold separately and to be mounted by yourself.

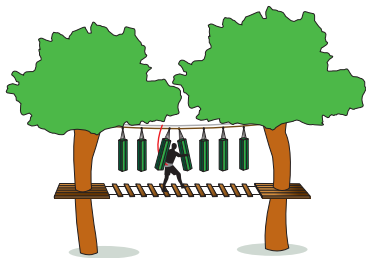

## The pawn

Hanging foam obstacle equipped with a suspension ring.

**Standard color:** green.

**Foams length:** 0,90 m.

**Total height:** 1,50 m.

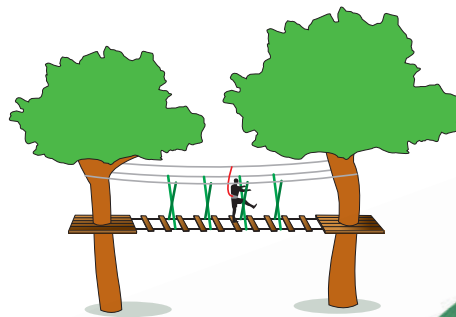

**Other colors** on request.

Level of difficulty

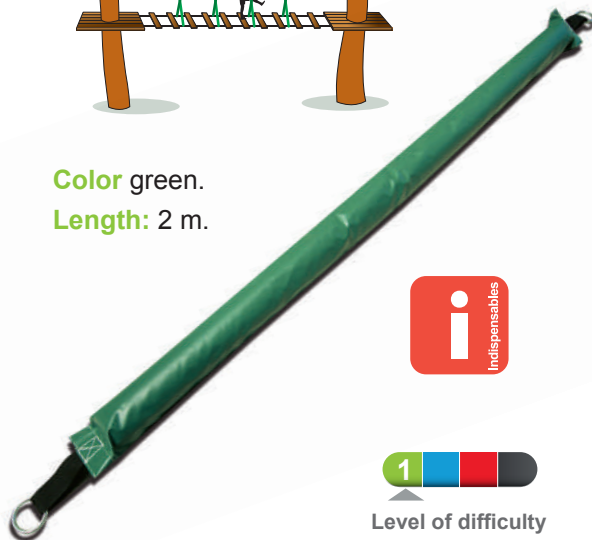

## Liana

Foam obstacle Ø 10 cm. Each end is closed and equipped with a fixing ring.

**Color** green.

**Length:** 2 m.

Level of difficulty

## Slackline

### Cruise Kit

- Intended as an introduction for all the family.
- Can be installed as you wish.

Width 50 mm. This strap gives you increased safety because it can be installed at knee height, making it safe for beginners.

**Length** 15 m.

**NEW**

- Ratchet with strap.
- 2 tree protection covers.
- Transport bag.

**Other Slackline kits are available.**  
To find out more, please don't hesitate to contact us.

## The slide

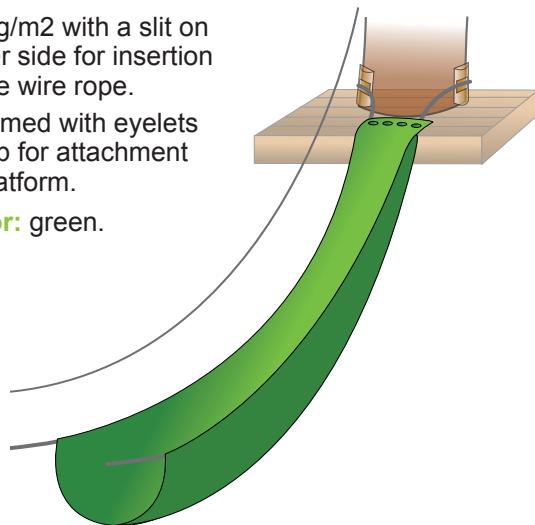

### Polyester Tarpaulin

PVC coated.

900 g/m<sup>2</sup> with a slit on either side for insertion of the wire rope.

Hemmed with eyelets at top for attachment to platform.

**Color:** green.

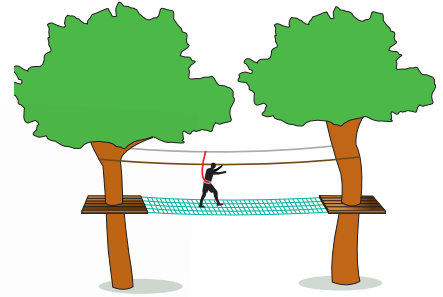

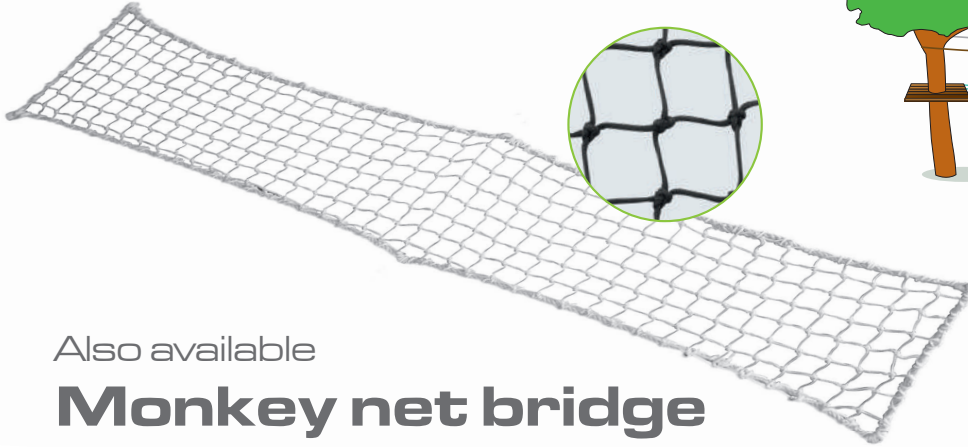

Possibility to add eyelift on the length to secure thanks to a safety net.

**Width:** 1 m.

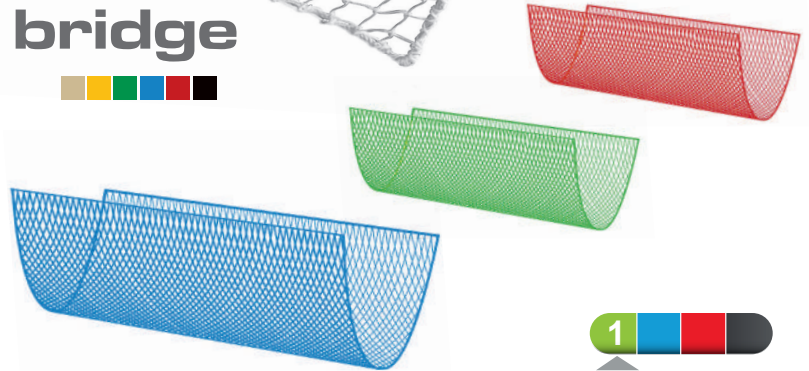

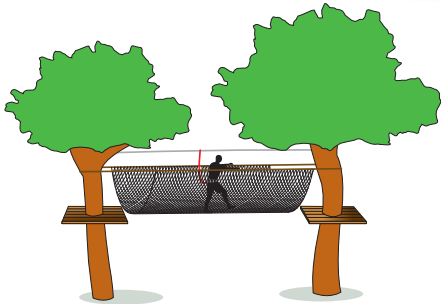

# Walking net

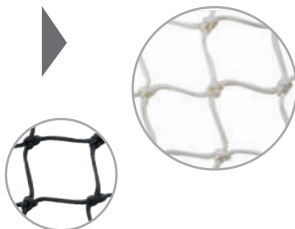

Also available

# Monkey net bridge

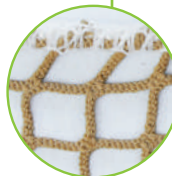

Level of difficulty

Braid: polyamide Ø 4,75 mm.  
Mesh: square, 50 mm knotted.  
Boltrope: Ø12 mm sewn all around the net. Color: white or black.

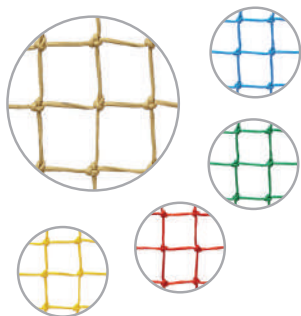

Braid: polyamide Ø 5 mm.  
Mesh: square, 30 mm knotless.  
Boltrope: Ø 10 mm color white sewn all around the net.  
Color: beige.

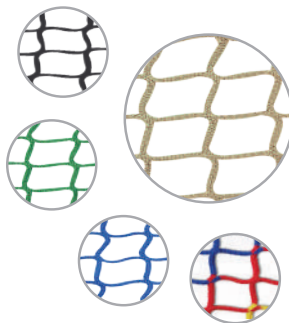

**Option strop with thimble**

Multi-purpose and easy assembly.  
Standard length 30 cm.  
Color white, black..

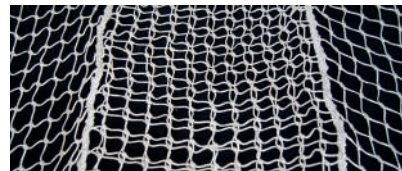

Braid: Polyester 4,50 mm.  
Mesh: 50 mm knotted square mesh, with perimeter bolt rope Ø12 mm, black. Beige, blue, yellow, red or green masscoloured net.

Braid: Polypropylene 5 mm.  
Mesh: 45 mm knotless mesh.  
White perimeter bolt rope Ø 10 mm, sewn around the edge. Net colours: blue, black, green, beige.

**Option double floor**

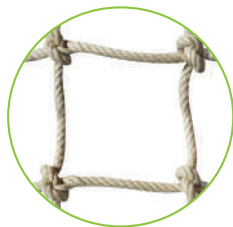

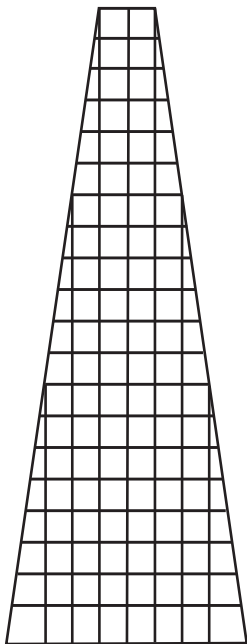

Multicolour net: use for indoors only.

# Climbing net knotted

**Meshes:** knotted square mesh.

- 250 mm : Ø 16 mm.
- 300 mm : Ø 20 mm.

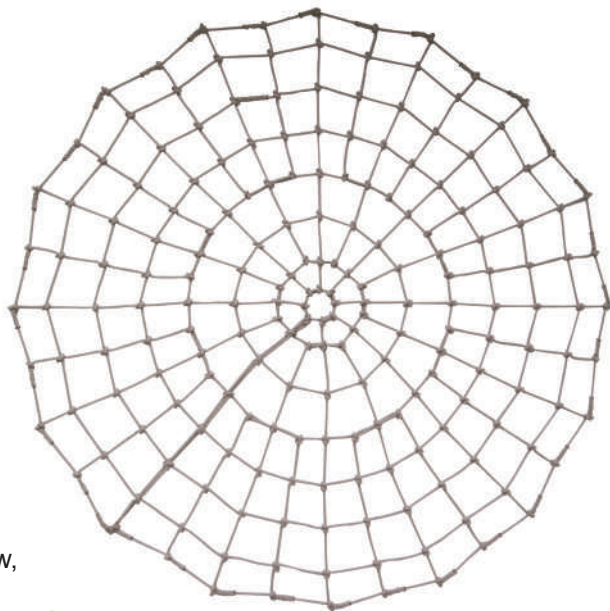

**Different net shapes:**  
rectangular - trapeze -  
circular.

**Ropes:** polypropylene,  
textured polypropylene,  
armed polypropylene.

**Colors:** green, blue, yellow,  
beige or havana.

**With ring at each corner angle.**

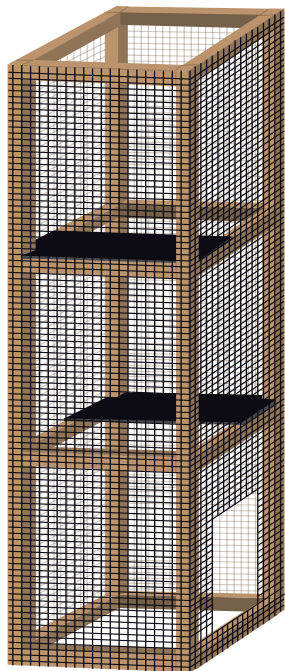

**Option:** peripheral rope for fixing  
the net.

Level of difficulty

## Kit chimney

Wooden square frame, with black non-slip exterior plywood half-bearing surrounded by 50 mm mesh netting. Kit for self-assembly.

**Net colours:**  
black, white,  
yellow, blue,  
green or red.

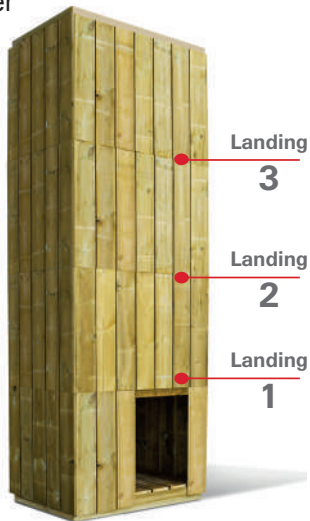

Level of difficulty

## Wood chimney

Made of autoclave class 4 wood.  
Composed of modules 115 cm x 78 cm x 99 cm high. Pre-assembled, to be fixed to the other module every meter.

Bottom, intermediary and bottom module supplied.

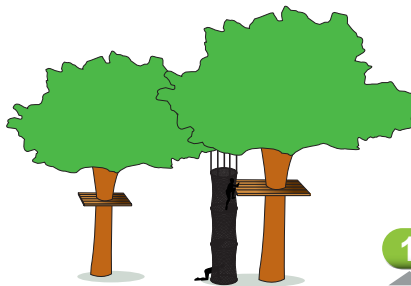

Level of difficulty

## The chimney

Rope Ø 16 mm

- Square mesh 250 mm.
- Equipped with a half landing every meter.
- In rope Ø 12 mm, mesh 100 mm, attached in a staggered fashion. Color: black.
- Ø of the chimney: 800 mm. 1 m - 1,20 m on request.
- Colors: green or beige.

Supplied with half landing.

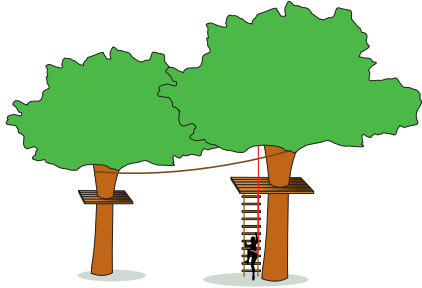

Level of difficulty

## Rope ladder

Beechwood bar Ø 30 mm  
and rope Ø 16 mm.

- With thimble and suspension rings at both ends.

Color of the suspension  
rope green, beige, havana,  
blue, yellow or black.

Level of difficulty

## Tarzan jump

Polypropylene textured  
rope Ø 30 mm.

- Thimble and suspension rings at the top.
- Reinforced grip at the bottom.

We can fix guides onto

Ø 12 mm.

Pulley buffer  
**DÉVAL' CÂBLE**

## RODEO-STOP

Automatic fall arrest device with stainless steel shock absorber.

## Compact energy absorber

Absorbs energy in the event of a fall by tearing its strap, thus limits the impact suffered by the user.

## ZIPSTOP

Self-regulating magnetic braking system for zip-lines.

### ZIPSTOP

Speed up to 24 km/h.

### ZIPSTOP SPEED

The best break for ziplines, it breaks up to the speed of 72 km/h.

## QUICK Flight

Magnetic induction braking technology.

### QUICK Flight

This device offers an exalting experience of free fall for aerial rope courses, jump towers, fun areas etc.

### QUICK Flight XL

Also available in XL size to jump from 12 m to 13 m.

## TRUBLUE

The next generation of indoor and outdoor climbing wall auto belays.

### TRUBLUE iQ

It covers a large range of weight: 20 to 150 kg.

### TRUBLUE Speed

Its advantage is the quick retraction specific to climbing contests and 166 trainings.

# We also supply

## Spirale marking

High density spiral marking for cables with 9 - 13 mm diameter.
