WHO ARE WE?

CUSTOMISED NETS FOR LEISURE FACILITIES

SPSFILETS specialises in the manufacture of nets for safety and adventure courses.

DESIGN, MANUFACTURING AND COMPLETE SUPPLY

We can offer you a final design with nets, accessories and play modules to create a space that reflects your style.

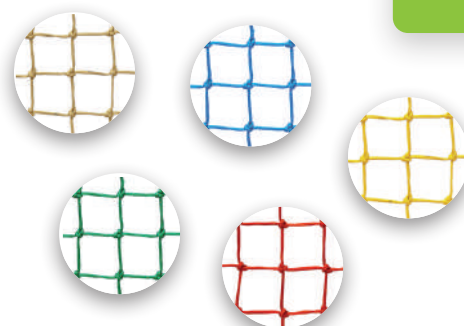

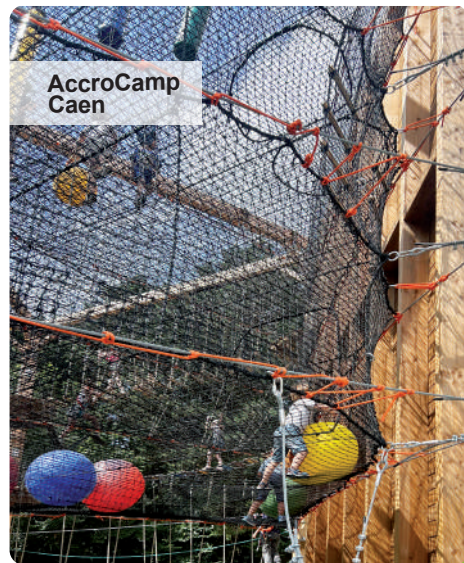

QUALITY, SAFETY AND RELIABILITY

Since our inception, we have developed high-quality products and solutions tailored to the needs of each customer.

PROFESSIONAL AND RESPONSIVE SUPPORT

We are committed to providing a professional and responsive service, ensuring the satisfaction of every project.

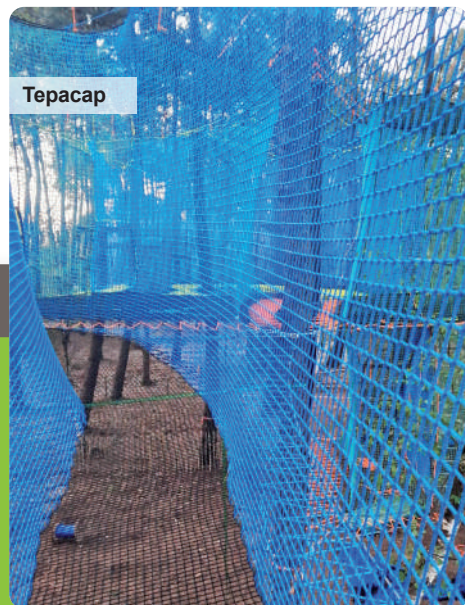

POLYESTER NET

- Material: Knotted polyester, high tenacity.
- 50 mm square mesh, 4.5 mm diameter, Ø 12 mm rope.
- Mesh strength of 300 kg per m2.

Area of use

Floor: gaming platforms, bounce areas
Wall: climbing walls, partition walls

POLYAMIDE NET

- Material: Knotted polyamide, high tenacity.
- 50 mm square mesh, 4.75 mm diameter, Ø 12 mm rope.
- Mesh strength of 320 kg per m2.

Area of use

Floor: movement surfaces, jumping modules
Wall: vertical walls, climbing elements

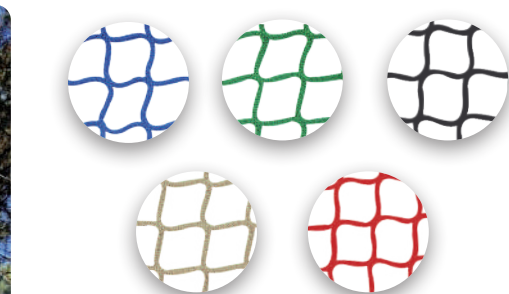

Our net features

Pre-stretched halyard option
Pre-stretched rope, Ø 10 mm, made of white polyester core covered with polypropylene. For securing and tensioning net paths and net seas.

Reinforced strope
Multi-purpose and easy to install on netting. Standard length 30 cm. Available in white or black.

POLYPROPYLENE NET

- Material: High-strength, knot-free woven polypropylene.
- 45 mm square mesh, 5 mm diameter, 10 mm diameter rope.
- Mesh strength of 200 kg per m2.

Area of use

Wall: vertical walls, climbing walls, suspended access

Ring option
Installation of steel rings every metre or less around the perimeter to ease the tensioning system.

Cable option
Installation of a Ø 12 mm steel cable sewn on the length of the net.

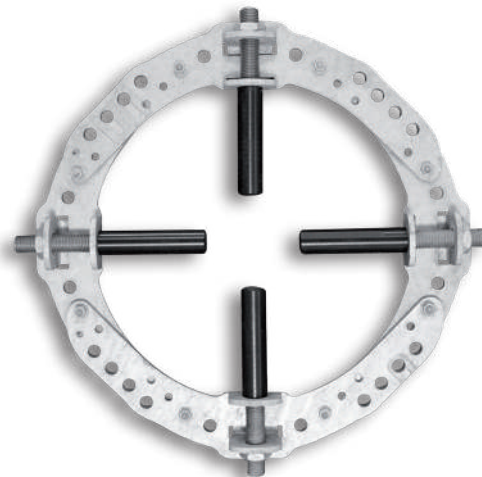

Our anchoring solution

Anchor ring

Designed to keep your trees healthy, this product offers a multi-purpose solution for your net courses.

- Made of galvanised steel.
- Compliant with Standard NF CE 15567-1.
- 360° possibilities.

Why choose our Kujanak solutions?

- Installation with no time limit.
- Low maintenance and servicing requirements.
- System can be reused on another tree.
- No metal parts in the shaft after disassembly.

A project with SPS Filets

1

Review of your request

We analyse your needs in order to offer you a technical solution tailored to your site and your objectives.

2

Receipt of plans

Please send us the plans for your project so that we can adapt to the specific features of the site.

3

Confirming your order

Once the quote has been approved, we launch the project with a dedicated contact person to monitor each stage.

4

Start of production

Our teams produce custom-made nets, accessories and wooden components according to the approved dimensions.

5

Delivery and installation

We provide on-site delivery and, if required, complete installation by our qualified technicians.
